Location Map, City of Hudson GIS

Request:

A variance request of thirteen (13) feet from the required side yard accessory structure setback of fifteen (15) feet, resulting in a side yard setback of two (2) feet pursuant to section 1205.06(d)(5)(D)(4), “Property Development/Design Standards – Setbacks” of the City of Hudson Land Development Code in order to build a detached garage.

Adjacent Development:

The site is adjacent to residential development to the north, east and west. The site is adjacent to a rail line and a City owned parcel to the south.

Hudson Board of Zoning and Building Appeals	
January 18, 2024	DOCKET 2024-239

Project Background

The property is located in District 3 – Outer Village Residential Neighborhood and is situated on Ravenna Street. The lot is approximately 0.22 acres and the house on the property was built in 1883. The owners purchased the property in 1991.

The applicant is requesting to construct a 20ft x 20ft (400 square foot) detached accessory structure to be used as a detached garage. The City of Hudson’s Land Development Code has the following regulation relative to the placement of accessory structures on a property –

- *1205.06(d)(5)(D)(4) – Minimum side yard setbacks. All other accessory structures: fifteen feet.*

The applicant is requesting a side yard setback variance of thirteen (13) feet from the required fifteen (15) foot setback resulting in a side yard setback of two (2) feet from the eastern property line in order to build a detached garage.

The applicant states that the overall lot size makes it difficult to meet all Land Development Code regulations. Additionally, the applicant states the structure would be used to store the applicants’ vehicles from the year-round weather they are currently exposed to. The applicant states that placing the structure along the eastern property line would be the most functional, aesthetically pleasing, and manageable placement.

Considerations
Section 1204.03 of the Land Development Code describes the standards for review of variance requests. These standards are listed below, along with staff findings to assist in your determination. All findings are subject to additional testimony presented to the Board during the public hearing:

1. Whether the property in question will yield a reasonable return or whether there can be any beneficial use of the property without the variances:

Staff acknowledges an enclosed garage is significant to provide reasonable return and beneficial use of the property and some amount of variance may be justified; however, staff questions if the application has sufficiently documented the need for a substantial thirteen (13) foot variance, as further discussed in this analysis.

2. Whether the variance is substantial:

The variance would represent an 86% deviation from the code requirement.

3. Whether the essential character of the neighborhood would be substantially altered or whether adjoining properties would suffer a substantial detriment as a result of the variances:

Staff notes the following:

- The lot is approximately 0.22 acres.
- The existing house has a fourteen (14) foot side setback along the eastern property line.
- The structure would be located entirely behind the main mass of the house in the rear yard.

Hudson Board of Zoning and Building Appeals	
January 18, 2024	DOCKET 2024-239

City Departments

Public Power

Assistant Public Works Superintendent Dave Griffith has submitted comments dated 4/3/2024. Mr. Griffith has the following general findings:

- The requirement for the existing overhead service (120/240v) is a 3.5' minimum vertical clearance above the proposed roof and/or 5' horizontal clearance to the sides of the structure.
- The communication lines are visibly low, and the property owner would need to contact each of the communication companies for possible solutions.
- One option for consideration would be to have all utilities placed underground to the existing residence. For the electric portion, all work would need to be completed by a licensed electrician and must pass a Summit County Electrical inspection. If this option is selected, we would need to work with the electrician to coordinate the cutover. Additionally, we would need to be contacted in advance so a new feed point (handhole) can be installed.

Additional Approvals

The proposal would also require the following:

- A design review with the Architectural and Historic Board of Review.
- Administrative approval.

Type of Hearing Request

Type of Request:*

Variance

Year Property Purchased*

1991

Code Required Regulation (please indicate feet, s.f. or height)* 

1201.07.c

Requested Variance (please indicate the amount of the variance in feet, s.f. or height)* 

20 s.f.

Resulting Set-Back (please indicate feet, s.f. or height)* 

40 s.f.

Explanation of Request and Justification:*

This variance is needed due to the small lot and position of the house on the property in relation to the east side of the property.

Supplemental Information for Determining Practical Difficulty

The property in question will yield a reasonable return and there can be a beneficial use of the property with the variance because:*

We currently do not have a garage. Our vehicles are exposed to the weather all year long. It would be much safer for the vehicles and add property value to our home.

The variance is
insubstantial

Describe why the variance is substantial or insubstantial*

The variance moves the normal 3' off set from the side offset to a 2' offset.

**Would the essential character of the neighborhood
be substantially altered?***

no

Explain why the request is the minimum amount necessary to make reasonable use of the property or structure(s):*

The existing home at 166 Ravenna St. is positioned 14 feet from the side yard of the property line and the angle of approach to enter the new garage will be more difficult to navigate and have a higher chance for property damage.

Would adjoining properties be negatively impacted?*

no

Describe how the adjacent properties will not be affected.*

I have discussed this with our neighbors and they are happy we are getting a garage and offered their help if needed.

Will this request adversely affect public services (mail, water, sewer, safety services, etc.)

no

The situation cannot be feasibly solved by means other than a variance. Explain:*

I have moved the garage as far to the west as I can to reasonably accomodate the side yard easement requirement. There is not enough property on the side yard of the house and this variance will make the approach manageable.

The spirit and intent behind the zoning requirement would be observed and substantial justice done by granting the variance. Explain below:

This is an old home that was built as the one of the original Chapman Estate lots. Homes like ours were set up differently than the homes in the newer Hudson developments. In the older areas of Hudson, many homes and structures are close to the property line. This allowance will enhance the street view of our home, presently and for future owners.

The circumstance leading to this request was not caused by current owner. It was caused by:*

Original home positioning on the property.

List any special circumstances particular to the property/lot (i.e.: exceptional irregularity, narrowness, shallowness or steepness) these circumstances are:*

this property has a narrow side yard on the driveway side and will need the requested easement to accomidate the garage and garage door access.

BZBA Meeting Information

The following persons are authorized to represent this application with respect to all matters associated with the project*

Daniel Marinchick

By checking this box, I do hereby certify that I am authorized to represent the property owner and to accept any conditions that the Board may impose.*

By checking this box, I do hereby certify that the information to the City of Hudson in and with this application is true and accurate and consents to employees and/or agents of the City of Hudson entering upon the premises of this application for purposes of inspection and verification of information pertaining to the application, and if this application is approved, to verify conformance to requirements and conditions of such approval. I acknowledge that City reviews or approvals do not absolve the subject property from deed restrictions, easements, or homeowner association covenants, restrictions, or regulations regarding structures and uses on the property. *
