**Explanation:** This indicator is used by The State Auditor's Office as one of the Financial Health Indicators. They are published as guidelines by the Auditors Office and are not requirements. This indicator is total debt service expenditures divided by total General Fund Revenues. This indicator identifies the percentage of the budget used/needed for repayment of debt. Higher debt service expenditures to total revenues is unfavorable since the entity spends more of its current budget on debt repayment. An increasing trend of debt service expenditures to total revenues may mean the percentage of budget dedicated to debt payments is increasing; and therefore, less revenue will be available for capital asset repair/replacement or meeting current operating demands.

**Critical Outlook:** Ratio greater than 15%

**Cautionary Outlook:** Ratio between 12% - 15%
