

# Site Plan

**Stainless inserts installed into sign panel and stainless pan head screws secure ACM tenant panels.**

\*In the event of a vacancy, all other sign panels would be moved up, creating a black space at the bottom.

**Sign panel is 1-1/2" 20# High Density Urethane with Vcarve address and decorations. Primed and painted steel hanger bars are laminated into the panel also for a permanent, secure fit. Main panel is painted a matte finish in Black. Aluminum Composite Material (ACM) panels are secured to main panel by Stainless steel inserts and stainless screws. Screw heads painted white to match ACM tenant panels. Graphic are HP cut vinyl**
