9100/9605

CLASSIC STEEL

Sonoma panel, Custom finish, Stockbridge windows, Decorative hardware

style. safety. variety.

Built for performance and affordability, Models 9100 and 9605 offer robust features with a variety of options at affordable prices, adding style and curb appeal to your home.

These doors are chosen by homeowners for their insulating value, durability, style and safety features.

Ranch panel, Brown finish

PERFORMANCE FEATURES

TorqueMaster® Plus Counterbalance is the first counterbalance system to seal springs safely within a steel tube. It contains an anti-drop feature that reduces the risk of door free fall.

Tamper-Resistant Safety Bottom Brackets help avoid possible injury by preventing inadvertent loosening when the counterbalance cables are still under tension.

Pinch-Resistant Door Panels are engineered with pinch-resistant design to prevent finger injuries while the door is closing.

Structural Reinforcements Available with structural reinforcements for use in coastal regions. They meet wind load requirements of the International Building Code, Florida Building Code and Texas Dept. of Insurance.

High Cycle Spring Option Choose a 25,000 cycle spring for almost twice the life of a standard torsion spring.

Horizontal Integral Struts at the top and bottom of door sections adds rigidity and strength for long life and smooth operation.

Thermal Efficiency Foamed in place polyurethane insulation* can improve your home's thermal efficiency, reduce street noise and make the door operate more quietly.

Warranty Limited Lifetime Warranty against cracking or splitting due to rust-through and against degradation of the foam insulation. See full warranty for complete details.

*Polyurethane insulation provides superior insulation value and thermal efficiency compared to polystyrene.

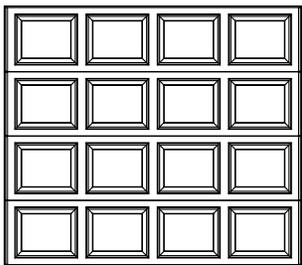

9100/9605 Model Comparison

	MODEL 9100	MODEL 9605
Door construction	3-layer construction Steel/Polyurethane/Toughgard™ backer	3-layer construction Steel/Polyurethane/Steel
Insulation	Foamed-in-place polyurethane with R-value of 9*	Foamed-in-place polyurethane with R-value up to 10*
Wind load models	Available	Available
Warranty	Limited Lifetime	Limited Lifetime

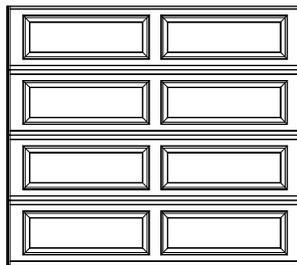

*R-value of 9 for 7' tall doors; R-value of 10 for 8' tall doors. Wayne Dalton uses a calculated door section R-value for our insulated doors.

63 DIVISION STREET

H Frederick Baldwin Tenant House
1852

144

Frederick Baldwin, of a pioneer Hudson family, built this brick house, a New England one-and-a-half, as an investment property in the railroad boom years. Many small houses were built in Hudson during that time to provide for an expected surge in population.

The paint was stripped from the brick in the 1960s, returning it to its original color, and there were extensive alterations and improvements after 1910. There are wide board poplar floors throughout the interior, and some original windows and two panel Greek Revival doors have survived.
