SELLER DESCRIPTION

1999 Gmc C8500, Altec knuckle boom 55 working height Dielectrically certified. It also got a material handling jib on it as well. I believe its rated for 3,000 lbs. I have gloves, boots, sleeves, and blankets, all regularly tested at Brenco in Cincinnati, on the truck. It also has quite a bit of material and automatic splices as well. Would consider leaving everything on the truck for asking price. \$20,000, 513-502-4747
