Product Description

CinderBlock panels are made from pouring high-density polyurethane into a mold that was cast from real concrete blocks. This process gives the CinderBlock panel the truly authentic look of real cinder block. CinderBlock panels are extremely lightweight, are only ~1" thick and are simply screwed onto the wall. No need for intense labor or reinforcement of walls.

CinderBlock faux concrete panels are designed with the installer in mind. These faux concrete panels are easy to install as they were designed with a shiplap edge and can be cut with a normal wood saw blade. All that is required for install are a few simple tools and a few hours.

MSDS for Touch-up Kits

To obtain the MSDS for Touch-up kits:

1. On the inside flap of the Touch-up kit box, or on the 12 pack case of Touch-up kit, locate the sticker with the product code [i.e. LLA0526]
2. Go to www.valsparwood.com/msds/msds.jsp
3. Enter the product code in the upper left corner of the website under MSDS/TDS
4. Click submit and the correct MSDS file should open

GENERAL SPECIFICATIONS

PERFORMANCE

- Transforms porches, patios, garages, and more into your customers' new favorite spaces
- Uses vinyl-glazed panels that are remarkably strong, shatterproof, and flexible
- Floor to ceiling views and ventilation
- Creates beautiful indoor/outdoor living for any homeowner's style
- Vents can be removed in seconds for easy cleaning
- Provides a barrier against outdoor pests
- Easy operation thanks to corrosion-resistant wheels
- Eliminates 99% of harmful UV rays
- Consumers choose their level of privacy with various options

ENERGY PERFORMANCE

- Shade and reduced solar heat gain
- Reduction of extreme heat, cold, and humidity

CONTINUOUS PROTECTION

- Works well in hot and cold climates

FEATURES

- Custom built to meet any style
- Easy to operate and very low maintenance
- Durable aluminum framing
- Light weight and customizable

RESIDENTIAL WARRANTY

- Lifetime frame warranty*
- 10-year warranty on vinyl, screens, and moving parts*

** Some restrictions may apply. Refer to full Eze-Breeze warranty for complete details.*

STYLES

- Vertical 4-Track
- Horizontal Side Slider
- Side Slider Garage Door Screen
- Standard Fixed Lite Lip Frame and Trapezoid
- Heavy Duty Fixed Lite Lip Frame and Trapezoid
- Removable Vent Fixed Lite
- Cabana Door

FRAMES:

- Heavy-duty extruded aluminum
- Outside Mount (OSM): Mounted from the outside; installation flange on the exterior side of the opening
- Inside Mount (ISM): Mounted from the inside; installation flange on the interior side of the opening

FRAME COLORS

- Standard: White
- Optional: Bronze, Beige

VINYL COLORS

- Standard: Clear
- Optional: Smoke Gray, Bronze, Dark Gray

SCREEN MESH AND COLORS

- Standard: 1814 Charcoal
- Optional: 1814 Gray, 1816 Charcoal, 1816 Gray, 2020 Charcoal, 2020 Gray, Charcoal SunScreen®, White Sunscreen®, BetterVue® Charcoal

SIZE INFORMATION

Measuring:

- We recommend that at least three (3) measurements be taken on the width and height of the opening
- When placing your order, give the smallest recorded measurement for both width and height

Ordering:

- “Opening Size” measurement is preferred
- All sizes must be given width x height in inches

Size Selection (varies by product):

Opening size with 1/8" cutback (deduction)	Size of the finished opening; product will be manufactured 1/8" smaller in width & height
Opening size with 1/4" cutback (deduction)	Size of the finished opening; product will be manufactured 1/4" smaller in width & height
Opening size with 3/8" cutback (deduction)	Size of the finished opening; product will be manufactured 3/8" smaller in width & height
Actual window size with no cutback (no deductions)	Actual unit size not including the installation flange; product will be manufactured to this size

GENERAL SPECIFICATIONS

VENT INFORMATION

Identifying Vertical 4-Track Vents

Vents are numbered 1-4 starting at the top

Vent #1 - smallest in width and located in the outermost track

Vent #2 - located in the 2nd track from the exterior

Vent #3 - located in the 3rd track from the exterior

Vent #4 - largest in width and located in the innermost track

Identifying Side Slider Vents and Tracks:

Vents are numbered left to right from the inside-looking-out. Tracks are lettered A - D from inside-looking-out.

MOUNTING INFORMATION

Inside Mount Horizontal Side Sliders:

Regular Mount: Weepholes are located on the opposite side of the flange

Reverse Mount: Weepholes are located on the same side as the flange

SPREADERBAR INFORMATION

Identifying Side Slider spreader bar location

Measure from the bottom of the opening to the center of the spreader bar

DOOR INFORMATION

Cabana Door Hinge and Swing

All doors are viewed from the direction of swing

2 x 2 MULL POST

Aluminum post for mulling Eze-Breeze products together. Available in 16' stock lengths.

TRANSPORTATION

Products delivered by 3rd-party carrier may have size limitations. Consult your Eze-Breeze representative for details.

Note: Eze-Breeze reserves the right to change material design and/or construction without notice or liability.

VERTICAL 4-TRACK (4V60)

FEATURES:

- 1" nominal front flange
- 2" nominal frame depth
- Glazed with 10-mil clear vinyl
- Outside mount or inside mount frame
- Equal interlocking vents
- Tilt in, removable vents
- Spreader bar(s)
- 1814 charcoal screen rolled-in frame - Outside mount

OPTIONS:

- 2-, 3-, and 4-vent configurations
- Custom sizes with or without deduction
- Mixed vinyl color in vents
- Lipframe screen attached to frame - Inside mount

SIZING

Outside Mount Frame:

- Standard: Opening size with 1/8" deduction in width and height
- Option: Opening size with 1/4" deduction in width and height
- Option: Actual unit size without deductions

Inside Mount Frame:

- Standard: Opening size with 3/8" deduction in width and height
- Option: Actual unit size without deductions

To use this chart with twin and triple units do the following:

Twin unit: divide opening width by 2 then locate that size on the chart above

Triple unit: divide opening width by 3 then locate that size on the chart above

HORIZONTAL SIDE SLIDER (SS10)

FEATURES:

- 7/8" nominal front flange - Outside mount frame
- 1-1/8" front flange - Inside mount frame
- 2-track frame depth 1-5/8"
- 4-track frame depth 3-3/8"
- Sill with flange
- Glazed with 10-mil clear vinyl
- Outside mount or inside mount frame
- Equal removable vents
- Factory installed swivel latches
- Neoprene rollers
- Spreader bar(s)
- 1814 charcoal screen rolled-in frame

OPTIONS:

- Configurations with up to 10 vents
- Custom sizes with or without deduction
- Mixed vinyl color in vents
- Unequal vents
- Pull handle
- Standard or reverse stack

SIZING

Outside Mount Frame:

- Standard: Opening size with 1/8" deduction in width and height
- Option: Opening size with 1/4" deduction in width and height
- Option: Actual unit size without deductions

Inside Mount Frame:

- Standard: Opening size with 3/8" deduction in width and height
- Option: Actual unit size without deductions

SIDE SLIDER GARAGE DOOR SCREEN (SS30)

FEATURES:

- 1-1/8" front flange
- 2-track frame depth 1-5/8"
- 4-track frame depth 3-3/8"
- Sill without flange and threshold both sides
- Glazed with 1814 charcoal screen mesh
- Inside mount frame
- Equal removable vents
- Factory installed thumb pulls
- Neoprene rollers
- Spreader bar(s)

OPTIONS:

- Configurations with up to 10 vents
- Custom sizes with or without deduction
- Kickplate 8", 12", or 16"
- Unequal vents
- Glazed with 10-mil vinyl
- Pull handle
- Factory installed swivel latches
- Standard or reverse stack
- Regular or reverse mounting

SIZE CHART

(SS10 / SS30)

2-TRACK UNIT CONFIGURATIONS

VENT QTY/CONFIGURATION	STANDARD VENT STACK	REVERSE VENT STACK	OPENING SIZES	
2 Vent 2T2V Stacked			Min (Vinyl / Screen) Max w/Vinyl Vents Max w/Screen Vents	24" x 10" 108" x 108" 120" x 108"

4-TRACK UNIT CONFIGURATIONS

VENT QTY/CONFIGURATION	STANDARD VENT STACK	REVERSE VENT STACK	OPENING SIZES	
3 Vent 4T3V Stacked			Min (Vinyl / Screen) Max w/Vinyl Vents Max w/Screen Vents	36" x 10" 162" x 108" 180" x 108"
4 Vent 4T4V Stacked			Min (Vinyl / Screen) Max w/Vinyl Vents Max w/Screen Vents	48" x 10" 216" x 108" 240" x 108"

SS10 & SS30 inside mount units that exceed 192" actual unit width will be spliced.
Configurations available up to 10 vents. Contact your Customer Care Representative for additional information.

HEAVY DUTY LIP FRAME FIXED LITE (HLF20)

FEATURES:

- 7/8" nominal front flange
- 5/8" nominal frame depth
- Glazed with 10-mil clear vinyl
- Outside mount frame
- Spreader bar(s)

OPTIONS:

- Custom sizes with or without deduction
- Glazed with screen mesh
- Trapezoid shape

PERFORMANCE:

- Minimum Lip Frame actual size 5-1/2" x 5-1/2"
- Minimum Trapezoid actual size 5-1/2" x 5-1/2" x 4"
- Maximum Lip Frame actual size 144" x 50" or 124" x 84"
- Maximum Trapezoid actual size 144" x 50" or 124" x 84"

STANDARD LIP FRAME FIXED LITE (LF₂₀)

FEATURES:

- 1/2" nominal front flange
- 7/16" nominal frame depth
- Glazed with 10-mil clear vinyl
- Foam tape factory applied
- Spreader bar(s)

OPTIONS:

- Custom sizes with or without deduction
- Glazed with screen mesh
- Trapezoid shape

PERFORMANCE:

- Minimum Lip Frame actual size 2-7/8" x 2-7/8"
- Minimum Trapezoid actual size 3" x 5" x 3"
- Maximum Lip Frame actual size 124" x 50-1/2" or 124" x 84"
- Maximum Trapezoid actual size 144" x 50-1/2" or 124" x 84"

REMOVABLE VENT FIXED LITE (RV20)

FEATURES:

- 1" nominal front flange
- 2" nominal frame depth
- Glazed with 10-mil clear vinyl
- Outside mount frame
- Removable vent
- Spreader bar(s)
- 1814 charcoal screen rolled-in frame

OPTIONS:

- Custom sizes with or without deduction

PERFORMANCE:

- Minimum Single actual size 11-7/8" x 8"
- Minimum Twin actual size 42" x 8"
- Minimum Triple actual size 72" x 8"
- Maximum Single actual size 72" x 32"
- Maximum Twin actual size 108" x 32"
- Maximum Triple actual size 144" x 32"

DOORS

CABANA DOOR (CD90)

FEATURES:

- Vertical 4-Track Style with 14-1/4" kickplate
- Fixed Lite Style with 4-3/4" kickplate
- Traditional Z-bar frame
- 2-1/4" frame depth
- 3/8" saddle threshold
- 2-1/8" bore with 2-3/8" setback
- Handle and deadbolt bore 8" on-center
- Pre-hung
- Glazed with 10-mil clear vinyl
- Outside mount out-swing or in-swing configuration

OPTIONS:

- Nominal or custom sizes
- 1-7/8" or 2" bumper style threshold
- Single or double door configuration
- Lever type handle
- Equal leg frame adapter
- Glazed with screen mesh

PERFORMANCE:

- Minimum Single door with Z-bar frame 22" x 48"
- Minimum Double door with Z-bar frame 48" x 48"
- Maximum Single door with Z-bar frame 44" x 96"
- Maximum Double door with Z-bar frame 88" x 96"

CARRIAGE HOUSE STEEL

DOOR FEATURES

Effective Joint Seals

Snug fitting tongue-and-groove section joints reduce wind and weather from entering the garage.

Foamed-In-Place Polyurethane Insulation

Provides thermal efficiency with a U-factor* of 0.16 and an R-value** of 10 helps block street noise and makes the door operate more quietly.

Detailed Construction

Three-section styling on 7' high doors gives a custom design look. Our 8' high doors have four-section styling. All panels have finished interiors and low-profile hinges.

**TorqueMaster® Plus Counterbalance System**

Contains springs safely inside a steel tube to prevent accidental release of tension that could cause injury and features anti-drop safety technology.

High Cycle Spring Option

Choose a 25,000 cycle spring for more than twice the life of a standard torsion spring.

Limited Lifetime Warranty

*U-factor is independently tested and verified per ANSI/DASMA 105 using solid doors and specific product sizes.

**Wayne Dalton uses a calculated door section R-value for our insulated doors.

Classic-Craft Door System Specifications

DOOR PANELS	Faces: 3/32-inch minimum thickness, proprietary fiberglass reinforced thermoset composite, textured to duplicate hand-crafted hardwood master or smooth surface, stainable and paintable. Door edges: machinable kiln-dried hardwood, flush and square with door faces, lock edge reinforced with full-length integrated 3-1/2-inch wide engineered lumber core. Door bottom edge: moisture- and decay-resistant composite. Core: foamed-in-place polyurethane, density 1.9 pcf minimum. Except where certification does not permit, standard factory sizes may be edge trimmed or end trimmed in shop or field to suit replacement door size requirements.
OPTIONAL FACTORY-GLAZED GLASS OR GLASS INSERTS	Factory-glazed: perimeter moldings flush with skin and made as integral part of skin. Glass: minimum 1/8-inch tempered, two panes with sealed airspace between, air-space typically 1/2-inch. Options for leaded decorative glass panel in airspace between tempered glass panes with brass, brushed nickel or black nickel coming finishes. Etched glass options. Optional removable wood grilles. Optional permanent external lite dividers Inserts (lites): perimeter frames in raised-molding patterns, composite frame moldings wood grained or matte black aluminum, with molding patterns complementing raised panel moldings, stainable or paintable, screw-fastened to doors, screw holes concealed with grained plugs in matching material. Glass: minimum 1/8-inch tempered, two panes with sealed airspace between, airspace typically 3/4-inch. Options for leaded decorative glass panel or wrought iron grille in air space between tempered glass panes with brass, brushed nickel or black nickel coming finishes. Wrought iron grille available in matte black only. Etched glass options. Optional removable wood grilles.
OPTIONAL DECORATIVE PANELS	Molded from proprietary fiberglass-reinforced thermoset composite, wood grained to match door faces, stainable or paintable, fastened with very high bond tape.
GASKETING, WEATHERSTRIPPING	Jacketed thermoset open-cell foam, press-fit in kerfs at jamb stops in frames. Extruded thermoplastic elastomer, finned and chambered design, press-fit into bottom kerf of doors. Corner pads at bottom margin corners from jacketed thermoset open-cell foam.
HINGES, STRIKES, MULTI-POINT LOCKING SYSTEM	Steel, ball-bearing design, with a variety of finishes. Screws plated and finished to match hardware. Standard hinge size 4 x 4 x .098 inches. Strikes are proprietary adjustable type, permitting in-out adjustment of door in frame, up to 3/16 inch. Multi-point locking system is available in manual shootbolt or tongue versions.
FRAMES	Milled from 5/4 kiln-dried pine, profiled with 1/2-inch stop, standard depth 4-9/16 inches. Other frame depths available to match wall constructions. Exterior casing brickmould in WM180 pattern available. Optional frames in exterior grade red oak with matching brickmould. Optional rot resistant jambs.
SILL, SWING-IN, SWING OUT, SIDELITE OPTIONS	Wide range of sill options: fixed threshold, adjustable threshold, and public access available in bronze, mill, satin nickel and brass finishes. Double-door models: double door available with both leaves active and locking astragal available. Sidelite options: flush-glazed or lite insert models, with embossed panel & glass moldings, in 10 inch, 12-inch and 14-inch widths. Sidelite systems available with mullions separating doors from sidelites, and continuous sills and frame head, or as separately framed and cased units joined together.
TRANSOM OPTIONS	Transom frames, either rectangular, elliptical or half round, match door frames and have matching exterior brickmould. Transom frames in primed pine or clear northern red oak to match door frame option. Low-E or etched insulated glass. Options for leaded decorative glass panel in air space between tempered glass panes with brass, brushed nickel or black nickel coming finishes.

Fiber-Classic Door System Specifications

DOOR PANELS	Faces: 1/16-inch minimum thickness, proprietary fiberglass-reinforced thermoset composite, wood-grained in natural hardwood patterns, stainable and paintable. Door edges: machinable kiln-dried pine, primed, lock edge reinforced with engineered lumber core, lockset area reinforced with solid blocking for hardware backup. Door bottom edge: moisture- and decay-resistant composite. Core: foamed-in-place polyurethane, density 1.9 pcf minimum. Except where certification does not permit, standard factory sizes may be end trimmed in shop or field to suit replacement door size requirements.
OPTIONAL FACTORY-GLAZED GLASS OR GLASS INSERTS	Factory-glazed: perimeter moldings flush with skin and made as integral part of skin. Glass minimum 1/8-inch tempered, two panes with sealed airspace between typically 3/8-inch. Options for grooved, etched, Low-E, or grille between glass (GBG). Optional removable wood grilles. Optional permanent external lite dividers. Inserts (lites): perimeter frames in raised-molding patterns, molded from composite, wood-grained in natural hardwood patterns, stainable or paintable, screw-fastened to doors, screw holes concealed with grained plugs in matching material. Tested to withstand high service temperatures resulting from exposure behind storm doors or dark finishes. Glass minimum 1/8-inch tempered, two panes with sealed airspace between, airspace typically 1/4-inch to 3/4-inch. Options for leaded decorative glass panel or wrought iron grille in air space between tempered glass panes with brass, brushed nickel or black nickel coming finishes. Wrought iron grille available in matte black only. Options for grooved, etched, Low-E, grille between glass (GBG), or mini-blinds. Optional removable wood grilles. Optional permanent external lite dividers.
OPTIONAL DECORATIVE PANELS	Molded from composite, wood-grained in natural hardwood patterns, stainable or paintable, screw-fastened to doors, screw holes concealed with grained plugs in matching material.
GASKETING, WEATHERSTRIPPING	Jacketed thermoset open-cell foam, press-fit in kerfs at jamb stops in frames. Extruded thermoplastic elastomer, finned and chambered design, press-fit into bottom kerf of doors. Corner pads at bottom margin corners from jacketed thermoset open-cell foam.
HINGES, STRIKES, MULTI-POINT LOCKING SYSTEM	Steel, with a variety of finishes. Screws plated and finished to match hardware. Standard hinge size 4 x 4 x .098 inches. Strikes are proprietary adjustable type, permitting in-out adjustment of door in frame, up to 3/16 inch. Multi-point locking system is available in manual shootbolt or tongue versions.
FRAMES	Milled from 5/4 kiln-dried pine, profiled with 1/2-inch stop, standard depth 4-9/16 inches. Other frame depths available to match wall constructions. Exterior casing brickmould in WM180 pattern available. Optional frames in exterior grade red oak with matching brickmould. Optional rot resistant jambs.
SILL, SWING-IN, SWING OUT, SIDELITE OPTIONS	Wide range of sill options: fixed threshold, adjustable threshold, and public access available in bronze, mill, satin nickel and brass finishes. Double-door models: double door available with both leaves active and locking astragal available. Sidelite options: flush-glazed or lite insert models, with embossed panel & glass moldings, in 10 inch, 12-inch and 14-inch widths. Sidelite systems available with mullions separating doors from sidelites, and continuous sills and frame head, or as separately framed and cased units joined together.
TRANSOM OPTIONS	Transom frames, either rectangular, elliptical or half round, match door frames and have matching exterior brickmould. Transom frames in primed pine or clear northern red oak to match door frame option. Clear, Low-E, or etched insulated glass. Options for leaded decorative glass panel or wrought iron grille in air space between tempered glass panes with brass, brushed nickel or black nickel coming finishes. Wrought iron grille available in matte black only.

Smooth-Star Door System Specifications

DOOR PANELS	Faces: 1/16-inch minimum thickness, proprietary fiberglass-reinforced thermoset composite, surface lightly textured, accepts most exterior and interior paints. Door edges: machinable kiln-dried pine, primed, lock edge reinforced with engineered lumber core, lockset area reinforced with solid blocking for hardware backup. Door bottom edge: moisture- and decay-resistant composite. Core: foamed-in-place polyurethane, density 1.9 pcf minimum. Except where certification does not permit, standard factory sizes may be end trimmed in shop or field to suit replacement door size requirements.
OPTIONAL FACTORY-GLAZED GLASS OR GLASS INSERTS	Factory-glazed: perimeter moldings flush with skin and made as integral part of skin. Glass minimum 1/8-inch tempered, two panes with sealed airspace between typically 3/8-inch to 1/2-inch. Options for grooved, etched, Low-E, or grille between glass (GBG). Optional removable wood grilles. Optional permanent external lite dividers. Inserts (lites): perimeter frames in raised-molding patterns, molded from composite, wood-grained in natural hardwood patterns, paintable, screw-fastened to doors, screw holes concealed with grained plugs in matching material. Tested to withstand high service temperatures resulting from exposure behind storm doors or dark finishes. Traditions Series Steel Door System Specifications

DOOR PANELS	Faces: .018-inch (25 gauge) minimum thickness, tension-leveled cold rolled steel, zinc-coated, conversion-coated to permit paint bond. Door edges: machinable kiln-dried pine or engineered lumber mechanically locked to door faces, four-sided full thermal break provided. Lock area reinforced with solid blocking in area of passage and deadbolt locksets. May be prepared for cylindrical or full-mortise locksets. Door bottom edge: moisture- and decay-resistant composite. Core: foamed-in-place polyurethane, density 1.9 pcf minimum. Door faces factory primed white.
OPTIONAL FACTORY-GLAZED GLASS OR GLASS INSERTS	Inserts (lites): perimeter frames in raised-molding patterns, molded from composite, wood-grained in natural hardwood patterns, paintable, screw-fastened to doors, screw holes concealed with grained plugs in matching material. Tested to withstand high service temperatures resulting from exposure behind storm doors or dark finishes. Glass minimum 1/8-inch tempered, two panes with sealed airspace between, airspace typically 1/4-inch to 3/4-inch. Options for leaded decorative glass panel or wrought iron grille in air space between tempered glass panes with brass, brushed nickel or black nickel coming finishes. Wrought iron grille available in matte black only. Options for grooved, etched, Low-E, grille between glass (GBG), or mini-blinds. Optional removable wood grilles. Optional permanent external lite dividers.
GASKETING, WEATHERSTRIPPING	Jacketed thermoset open-cell foam, press-fit in kerfs at jamb stops in frames. Extruded thermoplastic elastomer, finned and chambered design, press-fit into bottom kerf of doors. Corner pads at bottom margin corners from jacketed thermoset open-cell foam.
HINGES, STRIKES, MULTI-POINT LOCKING SYSTEM	Steel, with a variety of finishes. Screws plated and finished to match hardware. Standard hinge size 4 x 4 x .098 inches. Strikes are proprietary adjustable type, permitting in-out adjustment of door in frame, up to 3/16 inch. Multi-point locking system is available in manual shootbolt or tongue versions.
FRAMES	Milled from 5/4 kiln-dried pine, profiled with 1/2-inch stop, standard depth 4-9/16 inches. Other frame depths available to match wall constructions. Exterior casing brickmould in WM180 pattern available. Optional frames in exterior grade red oak with matching brickmould. Optional rot resistant jambs.
SILL, SWING-IN, SWING OUT, SIDELITE OPTIONS	Wide range of sill options: fixed threshold, adjustable threshold, and public access available in bronze, mill, satin nickel and brass finishes. Double-door models: double door available with both leaves active and locking astragal available. Sidelite options: flush-glazed or lite insert models, with embossed panel & glass moldings, in 10 inch, 12-inch and 14-inch widths. Sidelite systems available with mullions separating doors from sidelites, and continuous sills and frame head, or as separately framed and cased units joined together.
TRANSOM OPTIONS	Transom frames, either rectangular, elliptical or half round, match door frames and have matching exterior brickmould. Transom frames in primed pine or clear northern red oak to match door frame option. Clear, Low-E, or etched insulated glass. Options for leaded decorative glass panel or wrought iron grille in air space between tempered glass panes with brass, brushed nickel or black nickel coming finishes. Wrought iron grille available in matte black only.
