

Proposed

Detailed Explanation of Project *

We want to eliminate the existing shutters and wood window trim to continue the vinyl siding over top of the old window location so it doesn't look like there is a window there. Hudson had previously approved a zoning application by the previous Owner to cover the old window location with shutters and trim to make it look like the window was still there, but that the shutters were closed over it. The previous Owner remodeled the bathroom in a way that it is not possible to install a window in the old window location, so we would like to not have shutters installed there and instead just want the siding to continue over it. We believe the closed shutters draws your attention more than having nothing there, and has more of a feeling of a boarded up window/broken window. Without the window there, it doesn't draw your attention as much and still looks balanced in our opinion and the opinion of our son-in-law who is a designer for a local remodeling company.
