

# Site Plan: 30 Ravenna Street

## 30 Ravenna House Sign

30 Ravenna Front Top Building, The Sign is 119". The width between windows is 163". From the bottom of the lights to the top of the sign, it is 8". From the bottom of the sign to the top of the roof, it is 8".

**The material is melamine composite board laminated.**

## Back Door Sign

The back door sign is the exact same as front, 36"W x 25"L. The top of the building is 72" down to top of sign and 54" from the bottom of the sign to the ground. It is 1" between the left wall to sign and 1" to the awning and right side of sign.

**The material is melamine composite board laminated.**

---

## Front Lawn Sign

The front lawn sign is 36"W x 25"L. The post is 53-1/4"W x 55"L

**The material is melamine composite board laminated.**

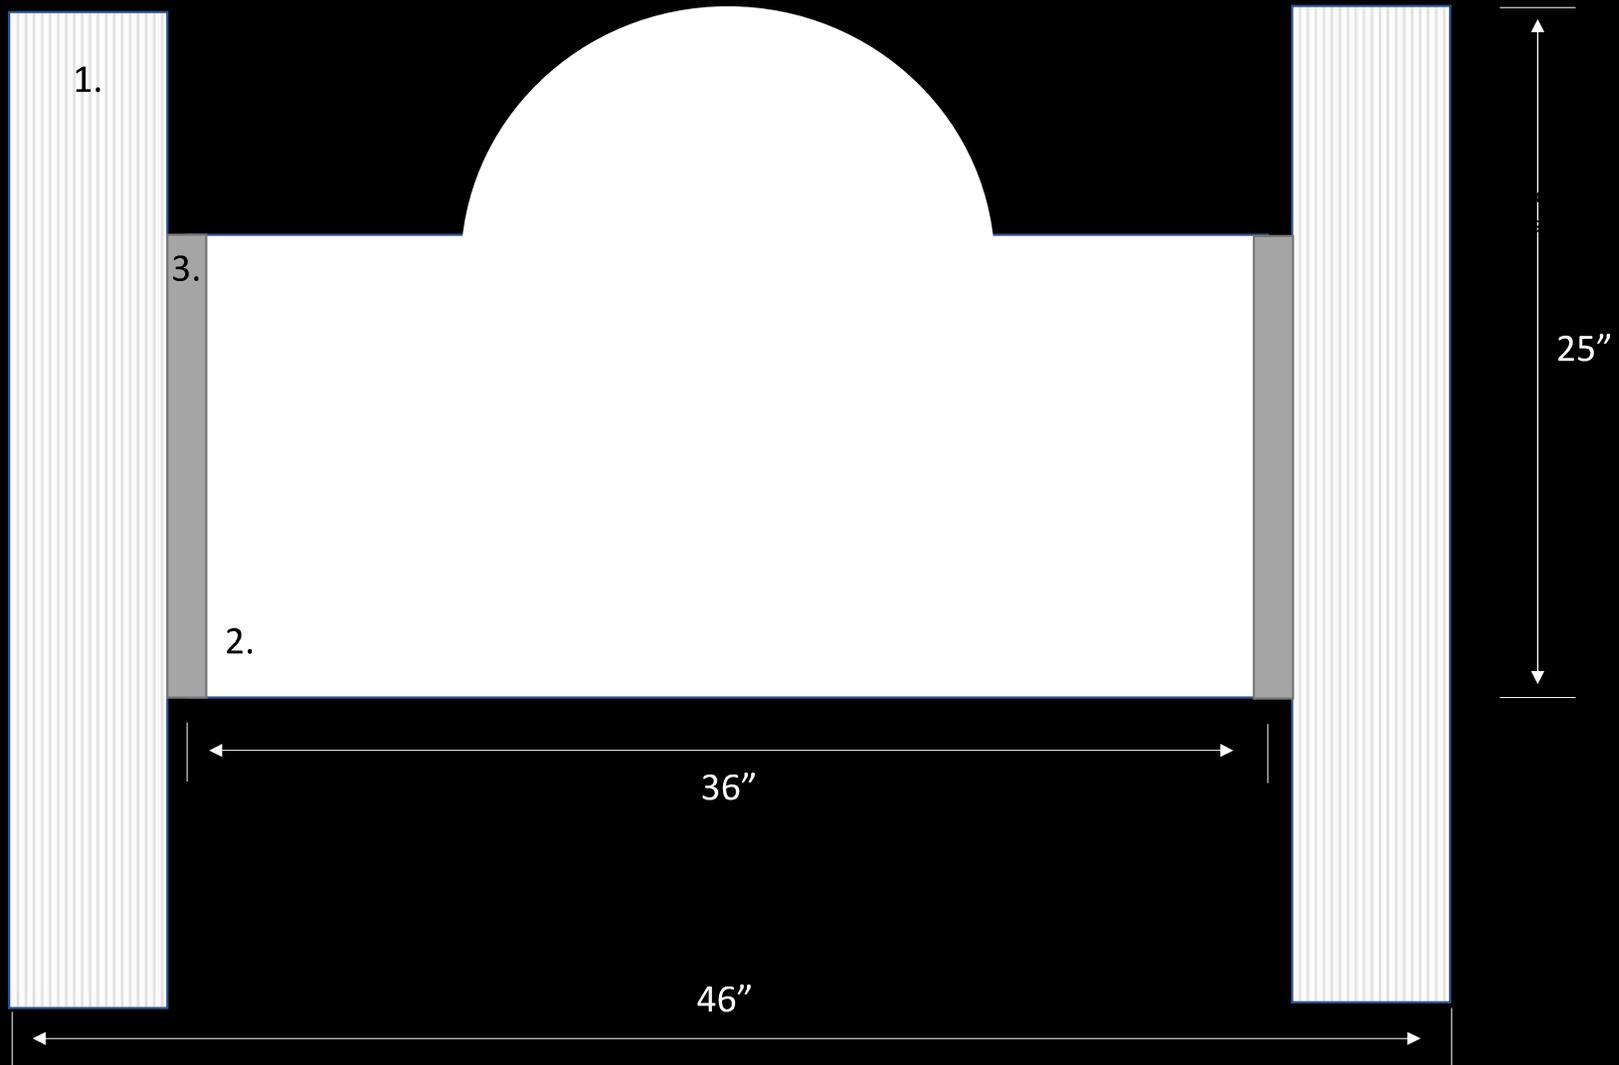

---

# Ohio Organics and Nature - 30 Ravenna Street - Hudson, OH 44236

## Ground Sign

1. 4x4" Pressure Treated posts capped with white PVC sleeves
2. Custom Printed Sign, 2 sided, composite material
3. Aluminum L-brackets, color-matched to sign for seamless aesthetic

1. Are the posts the same spacing as currently or are you moving one in – we are moving the post closest to the sidewalk in so that there is only 1" between the L Brackets and the sign on both sides.
2. What is the width of the L brackets. Per the drawings they appear to be several inches in thickness? – It was difficult to make the drawing to scale. The L brackets are only 1" in width. They are aluminum and will be the same color as the sign so they will appear as part of the sign.
3. What is the total sign height – are the posts being cut down at all? I was not going to cut down the height of the post closest to the building and the other would match in height. Any can you measure the height, I believe they are about 40" high. Note that the posts will have a full white PVC sleeve now from the top all the way to the ground.
