Presentation of the Public Works Facility Needs Assessment: highlights, cost analysis, and design phase recommendation.

Executive Summary: Staff wishes to review the needs assessment and discuss moving forward with the design phase of the project.

Legislative History

Resolution No. 17-67, authorizing the City Manager to enter into an agreement with DS Architecture for a Planning and Programming Study for a new Public Works Facility, passed April 18, 2017.

Purpose & Explanation

In 2016, staff determined that the proposed Public Works Facility Project required a more in-depth comprehensive needs assessment than currently existed. That effort has been completed by DS Architects, and staff wishes to review the assessment summary and associated cost opinion and seek direction to move forward with the project.

Timing Considerations

None.

Fiscal Impact

Currently Budgeted
Supplemental Appropriation Required
☒ Appropriation Not Required.

Suggested Action

Staff requests City Council direction to move forward with the design phase of the PW Facility Project.

Submitted by,

Jane Howington, City Manager

Frank Comeriato, Asst. City Manager-Operations

Brad Kosco, Assistant City Engineer

Eric Hutchinson, Assistant Public Works Director-Services
