Reference: Police Fleet Vehicle Upfitting

I am requesting approval for an expenditure of \$66,285.75 for the upfitting of three replacement police vehicles. These vehicles were ordered in 2025 as part of our department's ongoing fleet management. The Upfitting was also budgeted in the 2025 Capital Budget.

We obtained two quotes for this project as there are only two vendors in our geographic area that provide this professional service.

- Hall Public Safety Upfitters: \$66,285.75
- Fallsway: \$66,105.50

Although Fallsway provided a slightly lower quote, we recommend Hall Public Safety Upfitters as our preferred vendor for this project. Hall Public Safety will perform the upfitting onsite at the police department, which will alleviate the burden and staff time required to transport vehicles back and forth, ensuring a more efficient process.

Upfitting involves equipping police vehicles with the specialized components required for law enforcement operations. This includes emergency lights, sirens, core controllers, mounting systems, communication equipment, and other critical tools that ensure officer safety, operational efficiency, and readiness for emergency response.

I would be more than happy to address any questions you may have.

Thank you,

Perry Tabak

Chief Perry Tabak
