1	6336 Canterbury Drive		X				X	I think it is a complete waste of money and I don't believe anyone will use it.		X		I don't think anyone will use a sidewalk on Stow Road	This money could be better spent on other projects within the City.
2	6312 Stow Road		X				X	I appreciate the current bike lane (and the ditch) at the front of my yard for privacy sake.		X		North of SR 303 has the sidewalk on the east side. Fewer properties to encumber.	Stow Road is a avery busy county highway with truck traffic. Our tax dollars would be better spent maintaining the streets, and not adding more concrete to maintain that would <u>not</u> be used by rare foot traffic.
3	Parcel 3006323		X										See letter attached
4	6398 Stow Road					X		Trail is preferred if there is enough space	X	X		We have serious concerns about removal of old growth trees and shrubs that create a privacy and sound barrier from traffic.	It does not seem like there is enough space to make a sidewalk and also keep the trees and bushes on our property. We support this project in theory, but need more details about the impact on our property.
5	6276 Stow Road				X					X			Septic pipe, driveway tie in, no money out of my pocket. I'm on a fixed income. Do my taxes go up?
6	6244 Stow Road					X		Asphalt if have to choose one or the other		X		Would prefer it to be on the east side of the road. Our house is already very close to the road. Underneath the sidewalk is piping that is very old. On the south side, the ditch also causes problems for a sidewalk.	Trucks and cars consistently drive 40-45 MPH on Stow Road. Lots of texting. We took our fence down after a car mowed it down and even the trees didn't stop it. Small children and grown adults alike will have a false sense of security on the sidewalk/trail.
7	6559 Stow Road	X									X	I'm more in favor of a larger size/width to allow multi-use for bikes, walkers, etc without having to step aside into grass	I am extremely excited and looking forward to the completion. I truly believe that having curbs along the high use road helps to give users a safer outcome. A curb is a physical barrier that would give that small resistance to hitting people if a driver were to veer to the side unintentionally.
8	6266 Stow Road	X			X			Would also recommend a curb be installed to protect pedestrians	X				Thank you for this project! We will use this several times per week. (Also see email attached)
